Disclosure Statement

Dated public-source evidence for one legal entity. Not a credit score, audit, exclusion clearance, or contractor responsibility determination.

Coverage at a glance

Source	Status	What was checked
SAM entity registration	**Exact UEI matched**	Observed 2026-11-20
SAM published exclusions	**No exact UEI match**	Observed 2026-11-20; 0 CAGE-only candidate(s); not clearance
FPDS prime awards / IDVs	**Checked**	8,719 dated award actions; 146 direct IDVs
SAM contract subawards	**Checked**	5,158 role assignments; roles are not additive
SAM Contract Awards API	**Checked**	9,308 actions; 2026-11-01
GSA eLibrary	**Checked**	1 contract numbers; Current directory
SAM assistance subawards	**Limited**	No matches under stated keys; 2026-10-09
SBA subcontracting plans	**Checked**	292 matches; 2026-11-20
SAM award notices	**Limited**	No matches under stated keys; 2026-08-10
Archived award notices	**Limited**	8 matches; 2026-07-28
Acquisition forecasts	**Limited**	No matches under stated keys; 2026-11-20
SBA SUBNet	**Not attributable**	No contractor UEI in listing feed; excluded from entity totals

Colors describe source coverage or published evidence, not approval, eligibility or a vendor risk score.

Executive findings

8,719 dated FPDS prime award actions matched the UEI. The evidence tables also show reported subaward activity by role. These records describe reported activity, not contract performance or financial health.

No exclusion records matched the exact UEI in the available snapshot history. Verify current official records before relying on this screen for a decision.

The directory checks showed 1 contract number(s) in the current GSA directory and 292 matched SBA directory rows in the selected workbook years. A directory entry is not proof of an available award or open subcontracting work.

Prime contracts & vehicles

Contract rows group by awarding agency, award PIID and referenced vehicle. End dates are reported, not a forecast or proof a contract is active.

Direct IDVs and parent vehicles can overlap; these two counts are not additive.

Contract subaward network

Reports are separated by the subject's role. Counterparties with a usable UEI are grouped by UEI; missing identifiers stay in one unidentified bucket.

Repeated filings are evidence of reported relationships, not future work or an ownership link.

Assistance & SBA subcontracting plans

Assistance subawards are grant/cooperative-agreement flow-down records, not procurement spend or a census of direct grants.

SBA directory rows reflect the workbook year, not a new award or an open subcontract opportunity; the same award can appear in several workbooks.

Directory record IDs are in the evidence export; no GETWAB record page is available for this feed.

Notices & forward signals

An archived notice is linked only by exact awarding-agency code and PIID. Forecasts require an exact reference to the same agency and incumbent PIID. These are links to an award, not explicit company identification.

Different agency code systems and missing references can prevent links. Forecasts do not establish an open solicitation or a confirmed recompete. SUBNet has no stable contractor UEI and is not attributed.

For forecast matches, the export retains the source and record ID for verification.

Methodology

Scope & dates

UEI: . As-of date: 2026-11-20. Lookback: 5 years. Activity dates: 2021-11-20 through 2026-11-20, inclusive. Queried: 2026-11-20 15:50:47+00:00.

As-of filters the retained data. Backfilled, corrected, missing or unpublished records can affect comparisons; this is not a complete reconstruction of what was known then.

Identity & published exclusions

Use one exact UEI and the most recent retained registration snapshot by the cutoff. No name matching or affiliate aggregation. Registration status is the published value, not a new determination.

Use latest retained versions of exact-UEI exclusions. Separately check exact registration CAGE on records without a UEI; those are never confirmed findings. No name-only cases are attributed. Zero matches is not clearance.

FPDS federal award actions

Use prime award actions with the specified recipient UEI, grouped by federal fiscal year of the signed date. Net obligations include negative adjustments and exclude missing amounts. Missing dates are outside scope.

Identified awards use awarding agency and PIID plus the referenced vehicle agency and PIID. Incomplete keys stay in action counts. The total deduplicates across years, so annual award counts need not sum to it.

Reported subawards

Match the exact UEI as prime or subcontractor. Deduplicate matching rows by available subaward and report identifiers, then apply the subaward date. Exclude rows without a usable identifier or date. Corrections to identity keys may not reconcile.

A record can appear in both roles if both identifiers match. Do not sum roles or combine subaward amounts with prime obligations. No match does not establish absence of activity.

Additional datasets

GSA eLibrary is the current directory. SBA plan records are identified by workbook, PIID and agency. SAM Contract Awards keeps latest action versions at cutoff and drops published deletions when retained.

Current award notices require an exact awardee UEI. Archive and forecast links require exact agency and PIID. Missing identifiers, replaced snapshots and incompatible agency codes limit recall.

Yellow denotes limits, unresolved records or a source feed older than 30 days when an observed date is available. Red highlights an exclusion published as Active, not a decision. Green means the stated check ran, not that it was exhaustive.

Reproduce & independently review

The ZIP contains labeled read-only SQL and the bounded machine-readable evidence with counts, date scope and source failures. PDF tables show selections; neither file claims unlimited extraction. Reruns against later data may differ.

Confirm coverage and verify official evidence before acting. No credit score, audit, public certification, or contractor responsibility determination is provided.

Conclusions

Analyst commentary / static archive sample

What the data shows

The sources support different decisions. The 8,719 FPDS actions and $16.01 billion in signed net obligations describe the dated prime award record. The 1,122 distinct award identities are counted across the entire period; an award can appear in several fiscal years, so summing the annual identity counts would overstate the portfolio.

How to use the result

The exclusions check returned no exact match under the stated keys at the cutoff. That is neither clearance nor a substitute for a new official check. Review yellow coverage rows first: a source can be stale, linkable only by award ID, or not attributable at entity level. Read the GSA directory, SBA plans and subaward roles separately; none is additional prime spending.

About this example

This fixed public sample uses an actual GETWAB report snapshot dated 2026-11-20. Direct identifiers and record links are omitted. The commentary was written for this example without a runtime model. Reusable SQL and supporting tables are provided with an ordered report, not with this preview.
