Disclosure Statement

This report uses publicly available data from the Federal Procurement Data System (FPDS). It is intended for informational and analytical purposes.

At a glance

71,913 signed Award actions: 11,815 base, 60,098 identified modifications and 0 without a modification number. Latest signed date: 2026-11-18.

Competed among comparable base actions without a recorded parent: 37.3% (285/764). Single offer among base actions with a positive offer count: 60.2% (1,764/2,931).

Offer-count coverage: 24.8% (2,931/11,815). Set-aside code coverage: 13.0% (1,538/11,815). Small-business awardee share: 27.7% (3,267/11,815).

Net base-and-all-options action value from modifications: $9,732,662,628.99. Net obligations for all dated actions: $64,563,885,087.30. These amounts measure different things.

FY rows marked partial are not full-year comparisons. The review examples are starting points for checking records, not findings of noncompliance.

Competition and offer coverage

Fiscal year	Base actions	Competed / comparable	Offer counts reported	Single offer / reported
FY 2025	7,774	40.6% (169/416)	19.8% (1,541/7,774)	61.2% (943/1,541)

Methodology

Scope

FPDS Award actions (not IDVs or Other Transactions), signed in FY 2025 through FY 2027, UTC, through 2026-11-19. Latest matched signed action: 2026-11-18. Federal FY runs October through September. A closed fiscal year does not establish data completeness.

Awarding agency: Any (exact contracting-office agency, not funder); principal NAICS: 541512; PSC: Any. Selected filters are applied together.

Competition and participation

Base actions have all-zero modification codes. Other nonblank codes identify modifications. Blank codes remain in all-action totals only.

Competed: FPDS extent A, D or F; comparable denominator: A, C, D, F or G on base actions without a parent ID. B (not available), blanks and other codes are excluded. Parent-linked fair-opportunity codes are shown separately.

Single offer: one divided by positive recorded offers on base actions; zero or missing is not usable. Size: contracting officer's S versus S or O, not a bidder count. Blank set-aside is not NONE; restricted, sole-source and partial categories use distinct raw code lists in the SQL.

Value and review

Base-and-all-options is a signed transaction value including options, not cumulative ceiling, spend or obligations. For modifications, increases plus reductions equal the net. Missing values do not count as reported zero. Net obligations are a separate action amount including deobligations.

Review flags: competed/no-parent action with one offer; restricted code with other-than-small size; negative action value on a modification. These are recorded signals only. Check the action history and underlying documentation for context.

Reproduce the result

Query time: 2026-11-19T17:34:52+00:00. The ZIP contains both dated SELECTs; use GETWAB FPDS Query. The dashboard opens the award and modification; use the SQL action ID and parent/transaction fields to disambiguate. Revisions and additional reported actions can change results.

Conclusions

Analyst commentary / static archive sample

What the data shows

The 60,098 identified modification actions greatly outnumber the 11,815 base actions. This is an oversight workload signal: even a single award can generate many updates. A buyer-to-buyer comparison must use the same action definitions and account for the split between parent-linked and standalone awards.

How to use the result

Small status was recorded on 3,267 of the 11,815 usable base actions. Separately, 285 of 764 comparable base actions without a reported parent were coded competed. Those rates describe different denominators; they cannot be combined into one score. Use the identified examples to review action-level evidence before explaining the pattern.

About this example

This fixed public sample uses an actual GETWAB report snapshot dated 2026-11-19. The commentary was written for this example without a runtime model. Reusable SQL and supporting tables are provided with an ordered report, not with this preview.
