Disclosure Statement

This report uses publicly available data from the Federal Procurement Data System (FPDS). It is intended for informational and analytical purposes.

At a glance

214 base award actions. Latest matched signed date: 2026-09-30.

Reported restriction or program sole-source code: 37 / 95 (38.95%). Of those with mapped codes, 58 explicitly reported no set-aside. 3 were coded program sole source and 0 partial.

Small-business participation by action count: 80 / 214 (37.38%). 134 were coded other-than-small.

Unresolved set-aside: 119 blank and 0 unmapped. Unresolved size: 0 blank and 0 unmapped.

Reported set-aside and awardee size

Code	Type	Base actions	Small	Other than small	Unknown size
Blank	Not reported	119	15	104	0
NONE	Explicitly no set-aside	58	28	30	0
SDVOSBC	Service-disabled veteran-owned small business	24	24	0	0
SBA	Total small business	10	10	0	0
SDVOSBS	Service-disabled veteran-owned, sole source	3	3	0	0

Reported source of set-aside code

Source	Base actions	Mapped codes	Blank / unmapped
Vehicle source (A-E)	119	0	119
This action (F)	95	95	0

Participation by fiscal year

Period	Base actions	Restriction / mapped	Small / known size
FY 2025	74	14 / 37 (37.84%)	34 / 74 (45.95%)
FY 2026	140	23 / 58 (39.66%)	46 / 140 (32.86%)

Methodology

Scope and counting unit

FPDS Award records signed in FY 2025 through FY 2026, inclusive, through 2026-11-20 UTC. Federal fiscal years run October through September; an open year is partial.

Count dataset rows for base award actions only, using all-zero modification codes. Other modifications, blank modification codes, standalone vehicle records and Other Transactions are excluded. Counts are not distinct firms, contract dollars or official goal attainment.

Awarding agency: 3600; principal NAICS: 541512; PSC: Any. Supplied codes match exactly and combine. The awarding agency is the contracting agency, not the funder.

Two reporting fields, two denominators

Set-aside use: mapped restriction or program sole-source codes divided by all mapped values, including explicit NONE. Sole source and partial restrictions are counted separately in the CSV. Blank and unmapped codes remain unknown, not NONE.

The set-aside source field distinguishes the action (F), a vehicle (A-E) and unexplained values. A vehicle-source flag does not fill a blank action code; vehicle data are not used as a substitute.

Small-business participation: S divided by S plus O, using the contracting officer's recorded business-size determination for the action. Blank or unmapped size is neither S nor O. A zero denominator has no rate. The two fields do not establish current eligibility or certification.

Reproduce the results

Queried 2026-11-20 04:42 +0000. The ZIP contains the executed SQL and all 14 aggregate rows. The total, year, code, group and source sections regroup the same actions and are not additive. Rerun in FPDS Query; results can change with updates.

Sources and verification

GETWAB FPDS Query

FPDS data dictionary: set-aside, source and awardee size (10N, 10O, 11A)

Conclusions

Analyst commentary / static archive sample

What the data shows

The size determination was recorded for all 214 base actions, and 80 were coded small. Set-aside coverage is substantially lower: only 95 actions had a mapped value, and only those are the denominator for the 37 restricted or program-coded actions.

How to use the result

Do not treat blanks as unrestricted, or treat a small-business awardee as proof of a small-business set-aside. For market strategy, read the two fields independently and then check the opportunity's current eligibility requirements. This report does not measure a supplier's current status or awarded dollar share.

About this example

This fixed public sample uses an actual GETWAB report snapshot dated 2026-11-20. The commentary was written for this example without a runtime model. Reusable SQL and supporting tables are provided with an ordered report, not with this preview.
