Disclosure Statement

This report uses publicly available data from the Federal Procurement Data System (FPDS). It is intended for informational and analytical purposes.

At a glance

214 of 214 base-award identities had comparable values. 0 were not comparable; 0 had missing amounts as the primary exclusion.

Among comparable awards: 12 increased, 19 decreased, and 183 were unchanged.

3 met the review threshold: at least $1 million of net increase, or at least $250,000 and 25%. These are changes in potential value with all options, not obligations or spending.

The PDF shows up to 6 of the largest flagged awards and selected modifications. The CSVs include 20 screened award rows and 18 underlying modification rows.

Largest flagged increases

Award / vehicle	Initial	Reconstructed	Net change	Change %
3600 / 36C10B25N0064EHRM	3600 / 36C10B18D5000	$149,268,161.11	$210,746,222.95	$61,478,061.84	41.19%
3600 / 36C10B25C0057	$2,005,227.12	$3,048,401.34	$1,043,174.22	52.02%
3600 / 36C10B26N10260047	3600 / VA11816D1026	$2,294,617.80	$3,288,408.96	$993,791.16	43.31%

Selected underlying modifications

Award / vehicle	Mod / txn	Signed date	Reason code	Change
3600 / 36C10B25N0064EHRM	3600 / 36C10B18D5000	P00006 / 0	2026-01-12	B	$51,286,019.02
3600 / 36C10B25N0064EHRM	3600 / 36C10B18D5000	P00010 / 0	2026-06-15	B	$3,884,922.41
3600 / 36C10B25N0064EHRM	3600 / 36C10B18D5000	P00004 / 0	2025-09-25	B	$3,499,990.21
3600 / 36C10B25N0064EHRM	3600 / 36C10B18D5000	P00005 / 0	2025-09-29	B	$2,078,190.00
3600 / 36C10B26N10260047	3600 / VA11816D1026	P00002 / 0	2026-06-10	D	$993,791.16
3600 / 36C10B25C0057	P00001 / 0	2026-03-26	B	$548,087.10

Methodology

Scope and identity

FPDS Award actions signed in FY 2025 through FY 2026, inclusive, capped at 2026-11-20 UTC. The selected years must contain the base action. Standalone vehicle documents and Other Transactions are excluded.

Base-action codes: awarding agency 3600; principal NAICS 541512; PSC Any. Exact filters combine on the base; they do not exclude later modifications whose code changed.

Group by award agency and PIID plus referenced vehicle agency and PIID. For each modification and transaction number, keep the latest source revision by modification timestamp, then signed day and record ID.

Comparable potential value

Use one all-zero base action. Reconstruct the latest in-window total by adding the signed base-and-all-options changes on observed modifications. Do not use the feed's cumulative total, which can reflect later activity.

Exclude awards with multiple distinct bases, unknown modification codes, missing amounts, a modification dated before the base, or negative endpoints. Unseen actions and later revisions can change results. With a zero base, only the dollar threshold applies.

Flag a net increase of at least $1 million, or at least $250,000 and 25%. This analytical threshold does not indicate a cost overrun, compliance issue or payment.

Reproduce and inspect

Queried 2026-11-20 14:52 +0000. The ZIP includes the executed SQL, 20 award rows (up to 20, flags first) and 18 modification rows (up to 40 per listed flag, by magnitude). Counts precede these limits. CSV money is in cents.

Rerun in FPDS Query and verify the modification number and transaction against source records. This is a screen of currently observed data, not an archived snapshot.

GETWAB FPDS Query

FPDS data dictionary: base and all-options values (3A, 3AT)

Conclusions

Analyst commentary / static archive sample

What the data shows

All 214 screened award identities had comparable starting and reconstructed endpoints. The distribution was uneven: 183 unchanged, 19 down, and 12 up. Only three met the material-increase screen, which makes the underlying transactions more useful for review than a broad change average.

How to use the result

The screen reconstructs potential value under the initial and subsequent reported modifications, including options. It does not track outlays and does not explain the reason for any increase. Start with the modification number and sequence, then review the award record for scope, exercised options, or reporting corrections.

About this example

This fixed public sample uses an actual GETWAB report snapshot dated 2026-11-20. The commentary was written for this example without a runtime model. Reusable SQL and supporting tables are provided with an ordered report, not with this preview.
