Disclosure Statement

This report uses public agency forecasts, the Federal Procurement Data System (FPDS) and SAM.gov. It is intended for planning and research.

At a glance

As of 2026-11-19. The window starts on the as-of date and excludes 2027-11-19.

6,488 published planning records · 407,822 FPDS completion candidates · 8,847 posted SAM solicitations with a response deadline in the window. Latest matching SAM batch: 2026-11-19 (UTC).

Exact-link check: 0 in-window forecast records linked to a posted SAM notice by the cutoff. Separately, 3 distinct SAM notices posted 2025-11-19 through 2026-11-19 were linked by current forecast records. These counts are not a conversion rate.

The three groups are not additive. Review the official notice before bidding; a scheduled contract end is not a published follow-on.

Published forecast records

Source / target	Planned requirement / buyer	Forecast reference
HHS SBCX / Nov 2026	FY 2027 Anadarko Pharmaceutical Services / IHS	00c02ad0-856d-4d84-9a77-1b22f0f996b0

Methodology

Window and filters

As-of date: 2026-11-19 (UTC). Horizon: 12 calendar months, ending just before 2027-11-19. Forecast and notice rows use available snapshots observed by the cutoff; FPDS uses the signed action date. This is not a reconstruction of historical snapshots.

Awarding agency: Any; NAICS (industry): Any; PSC (product/service): Any. Filters combine and require the exact reported code in each source. Missing codes are not inferred; agency or PSC filters may remove entire forecast feeds.

Published plans and posted notices

Forecasts: active rows per source and source record ID, with an estimated solicitation date in the window. HHS reports a month, shown as a month; a month that overlaps the window qualifies. Duplicate requirements can appear across feeds.

Posted: unique solicitation or combined synopsis/solicitation records from the SAM bulk active feed, published by the cutoff, with a response deadline in the window. Deadlines are shown by UTC date; verify the exact time and amendments on SAM.gov.

FPDS completion candidates

From the prior five years of signed FPDS award actions, keep the latest action per agency, award PIID and referenced vehicle, then filter on current completion and the selected codes. This is not an option end date, confirmed contract status or recompete forecast.

Exact links and reproducibility

Match only a direct SAM.gov notice ID in the agency forecast to a SAM record published by the cutoff. Trailing check: 2025-11-19 through 2026-11-19 inclusive, across currently observed forecast records. Unlinked does not mean unpublished; the check measures link coverage, not conversion.

Data queried 2026-11-19 17:24 UTC. Display up to 12 rows per section; counts are calculated before sampling. The ZIP includes the four executed SELECTs. Rerun them where the FPDS, forecast and SAM datasets are available; a newer snapshot can change the results.

GSA Forecast of Contracting Opportunities
HHS Opportunity Forecast
DHS Acquisition Planning Forecast System
SAM.gov Contract Opportunities (official notice)

Conclusions

Analyst commentary / static archive sample

What the data shows

The three populations support different time horizons. The 8,847 posted requests are the immediate watchlist for amendments and deadlines. The 6,488 plans are earlier signals, while the 407,822 award identities are candidates based on reported completion dates, not confirmed follow-ons.

How to use the result

Do not add these populations or interpret their relative sizes as a conversion funnel. Prioritize direct notice links first, published plans second, and contract-end candidates only after checking the latest actions. The snapshot was dated; a deadline visible here should never be assumed to still be open.

About this example

This fixed public sample uses an actual GETWAB report snapshot dated 2026-11-19. The commentary was written for this example without a runtime model. Reusable SQL and supporting tables are provided with an ordered report, not with this preview.
