Disclosure Statement

This report lists plans published in public agency acquisition forecasts. It does not establish that an opportunity is open or funded.

At a glance

6,488 matching plans across 3 feeds. 6,484 reported a value estimate.

Latest matching record retrieved: 2026-11-19 (UTC). Expected dates and amounts can change; these records are not solicitations or funding commitments.

Records with reported codes: agency 0, NAICS 6,234, PSC 0. Code filters exclude records with missing codes.

The table shows 10 examples by expected release, including the earliest available record from each feed where possible. The ZIP includes all 6,488 matching records in CSV.

Methodology

Window and filters

As of 2026-11-19 (UTC); horizon: 12 calendar month(s), ending before 2027-11-19. Only active, currently available records retrieved by the end of the as-of date qualify. This is not a historical snapshot reconstruction.

Awarding agency code: Any; NAICS (industry): Any; PSC (product/service): Any. Applied filters must all match exact reported codes; missing codes are not inferred. Portrait changes presentation only.

Timing, values and source dates

One current row per feed and source record ID. Plans without expected solicitation timing are excluded. HHS reports a month, not a day; that month qualifies if it overlaps the window. A requirement can appear in more than one feed.

Value shows the source label or its official HHS range; numeric bounds are used if no label is supplied. TBD and unreported values are not counted as estimates. Bands are not added together. The table shows the source update date, then publication date if no update is given, or retrieval date if neither is supplied. The CSV separates all three dates (UTC).

Reproduce the results

Queried 2026-11-19 20:18 +0000. The ZIP includes 6,488 CSV rows in the SQL sort order and the exact SELECT. Counts precede the SQL limit. Run the SELECT in ClickHouse with access to the forecast dataset. Verify individual records using their source references; results can change as feeds refresh. This report does not calculate or validate posted SAM notices, FPDS awards, or future demand.

Conclusions

Analyst commentary / static archive sample

What the data shows

The snapshot contains 6,488 plans from three observed feeds. A value or value band appears on 6,484 records, but a range can still be wide and is not evidence of funds being committed. Feed-specific reporting can dominate the mix.

How to use the result

Use title, buyer, date precision and value band to narrow the watchlist. Treat a month as an interval, not an exact deadline, and confirm the current plan before allocating capture effort. The retrieval date is a snapshot marker, not a publication or amendment date for all rows.

About this example

This fixed public sample uses an actual GETWAB report snapshot dated 2026-11-19. The commentary was written for this example without a runtime model. Reusable SQL and supporting tables are provided with an ordered report, not with this preview.
