STANDARDIZED FEDERAL PROCUREMENT REPORT

FEDERAL CONTRACTS APPROACHING END DATE

Agency 3600 / NAICS 541512 (2026-11-19 to before 2027-11-19)

Prepared by: GETWAB INC.

Disclosure Statement

This report uses publicly available data from the Federal Procurement Data System (FPDS). It is intended for informational and analytical purposes.

At a glance

276 award identities have a reported current end date in the window. 17 fall within the first 30 days (or the full window if shorter).

Ultimate completion date: 146 later, 130 same, 0 unavailable, 0 earlier than current.

Most recent signed action among matches: 2026-11-16. A reported end date does not confirm contract status, an extension or a recompete.

The table shows the first 10 awards by current end date. The ZIP contains all 276 matches in CSV.

Reported completion dates

Current end	Ultimate end	Award / referenced vehicle	Supplier / awarding agency	NAICS / PSC
2026-11-19	2026-11-19	3600 / 36C24126N0105 | Vehicle 3600 / 36C10G24D0048	SOLDIERPOINT DIGITAL HEALTH, LLC / VETERANS AFFAIRS, DEPARTMENT OF	541512 / DG11

Methodology

Window and filters

As of 2026-11-19 (included); 12 calendar month(s), ending before 2027-11-19. Inclusion is based on the reported current completion date, never on the ultimate date alone.

Awarding agency: 3600; principal NAICS: 541512; PSC: Any. Supplied codes match exactly and combine on the selected action. Awarding agency means the contracting agency, not the funder.

Award identity and source coverage

Use observed FPDS award actions in signed-date partitions from ten calendar years before the cutoff through the cutoff, inclusive. Standalone vehicle and Other Transaction records are excluded. Keep one action per award agency and PIID plus referenced vehicle agency and PIID.

Choose the latest signed action, breaking ties by source modification timestamp and then record ID, before applying window and code filters. This uses currently available data, not a historical archive. Older awards without a recent action and incomplete award identities can be missed.

Current vs. potential completion

Current completion reflects the base and exercised options. Ultimate completion includes all options whether exercised or not. An equal date does not establish whether options remain. An absent date stays unreported; an earlier date is shown as reported, not treated as a valid option schedule.

Dates can change. This report does not establish active status, option exercise, a new solicitation or a recompete.

Reproduce the results

Queried 2026-11-19 20:32 +0000. The ZIP contains the executed SELECT and 276 CSV rows in report sort order, with full award and action identifiers. Headline counts precede the export limit. Rerun the SQL in FPDS Query or ClickHouse with access to these data; refreshed records can change the result.

Conclusions

Analyst commentary / static archive sample

What the data shows

Only 17 of the 276 reported completions fell in the first 30 days. For near-term research, start there, but check whether the most recent action has changed the date. In another useful split, 146 matched identities have a later ultimate date, consistent with the need to check possible options or extensions.

How to use the result

A current date, an ultimate date and a bid deadline are different concepts. The sample prioritizes follow-up research and does not claim that an award ended, an option will be used, or a replacement solicitation is coming.

About this example

This fixed public sample uses an actual GETWAB report snapshot dated 2026-11-19. The commentary was written for this example without a runtime model. Reusable SQL and supporting tables are provided with an ordered report, not with this preview.
