—	Other reported PSCs	-$917,576.02	7

Methodology

Source and coverage

FPDS Award actions in GETWAB's FPDS dataset. Actions without a usable signed date or obligation amount are excluded. Queried on November 19, 2026; latest signed date in the selected scope: September 30, 2026. This is not a completeness or refresh date.

Parameters

Funding agency code: GENERAL SERVICES ADMINISTRATION (4700). Exact funding/requesting match; not the awarding agency and not a roll-up of subordinate codes.

Start fiscal year: FY 2025. End fiscal year: FY 2026. Both endpoints are included. Fiscal years are assigned by signed date and run from October 1 to September 30. An open fiscal year is partial.

Layout: Portrait. This changes the page format, not the data.

Metrics and limits

Net obligations add the signed award-action amounts, including negative adjustments. They are not cash outlays or award ceilings. Actions count reported transactions, not distinct contracts.

Year-over-year change compares adjacent observed, completed fiscal years. Percent change divides the dollar change by positive prior-year net obligations. A missing year is not zero. Display rounding can affect totals by cents.

The ranking shows the leading 15 codes plus the selected code if outside the top 15. Codes that were not reported are not ranked. The PSC mix shows the 12 highest-net reported codes, with other and missing or malformed codes identified separately.

Reproduce the results

Open SFPR-FUND-COLL-1.sql in the accompanying ZIP (also available as a separate download). Run the labeled SELECT statements one at a time in FPDS Query. Confirm the signed-date and scope filters before comparing the result. Reruns against newly updated FPDS data may differ.

Conclusions

Analyst commentary / static archive sample

What the data shows

The selected funding agency recorded $42.34 million across 140 dated actions, and the FY 2026 net was about $15.19 million below FY 2025. In a cohort of this size, check whether a few adjustments or unusually large actions drive the change before concluding there is a trend.

How to use the result

R408 accounted for $15.88 million, roughly 38% of the two-year total. Use that concentration as a prompt to inspect the underlying actions. The code ranking is by identified product/service, and the selected funding agency should not be assumed to be the entity that issued every award.

About this example

This fixed public sample uses an actual GETWAB report snapshot dated 2026-11-19. The commentary was written for this example without a runtime model. Reusable SQL and supporting tables are provided with an ordered report, not with this preview.
