Methodology

Period and geography

Dated FPDS Award actions for all locations, FY 2026, selected by signed date (UTC) through 2026-11-19. Federal fiscal years start October 1. An open fiscal year is partial. IDVs and Other Transactions are excluded.

No geography filter is applied: domestic, overseas and unclassified locations are included. Records without a usable funding code are included in the total but displayed separately.

Funding agency and net obligations

Group by the recorded funding/requesting agency code, not the contracting office or a department roll-up. Each code shows its latest nonblank reported name in this scope; naming changes do not create a second ranked row.

Sum signed obligated amounts in exact cents, including deobligations. This is not outlays or a contract ceiling. Action counts include records without a dollar amount, and those amounts do not enter the sum.

Ranking and coverage

Rank usable codes with reported amounts by net obligations descending, breaking ties by code. Codes without amounts and blank or malformed codes are unranked. They remain in overall action counts.

The PDF shows up to 20 ranked codes and a reconciled remainder. The CSV lists every code, the unclassified group when present, and the overall total. Import the code column as text to retain any leading zeros.

Conclusions

Analyst commentary / static archive sample

What the data shows

The 315 ranked funding codes sit within a national net of $807.71 billion across 5.43 million dated actions. The Navy's $160.33 billion was approximately one fifth of that net. This is a ranking of funds attributed to the requesting agencies, not a count of contracting-office activity.

How to use the result

Read the classified ranking alongside the reconciliation for missing or unclassified funders. Large buyers may execute awards on behalf of a different funder, and negative transactions reduce the net. Before using this as a market map, narrow to the relevant market and inspect the related awarding entities.
