Disclosure Statement

This report uses publicly available data from the Federal Procurement Data System (FPDS). It is intended for informational and analytical purposes.

At a glance

$13,575,761.99 in net obligations across 81 dated FPDS Award actions. 11 PSCs with reported amounts were ranked.

Leading category: OFFICE FURNITURE (7110), $5,884,493.35 or 43.3% of the agency net.

Latest matched signed date: 2026-09-30. Actions without a usable PSC: 0. Actions without an amount: 0.

Shares are signed contributions to the positive agency net. Positive shares may sum to more than 100% when reductions offset them.

Methodology

Period and funding scope

FPDS Award actions for GENERAL SERVICES ADMINISTRATION (4700), FY 2026, selected by signed date (UTC) through 2026-11-19. A fiscal year starts October 1, and an open year is partial. IDVs and Other Transactions are excluded.

Filter on the exact funding/requesting agency code, not the awarding office or a parent department. No geography filter is applied.

PSC classification

Use the reported four-character product or service code. Historical codes are retained as reported. Each code shows its latest nonblank description in scope. Blank or malformed codes are kept separately.

Amounts and shares

Sum signed obligated amounts in cents, including deobligations. Net obligations are not payments or contract ceilings. Actions without an amount count as records, not as reported zeros.

Divide each group's signed net by the positive agency-wide net, which includes unclassified PSCs. No share is shown for a missing group amount or a nonpositive total. Negative shares represent net reductions.

Reproduce the result

The PDF shows up to 20 ranked codes and a reconciled remainder. The ZIP includes all groups as CSV, the PDF and the exact SELECT executed at 2026-11-19T18:25:29+00:00. Use GETWAB FPDS Query to rerun it. Import PSCs as text to preserve leading zeros.

Conclusions

Analyst commentary / static archive sample

What the data shows

PSC 7110 represented $5.88 million, or 43.3% of the reported $13.58 million net, across a scope of just 81 actions. A change in a handful of large reported actions could materially alter that mix, so concentration needs more than one period to establish persistence.

How to use the result

Compare the leading code with the other ten codes carrying amounts and the unranked or unclassified totals. Shares can also be distorted by netting positive and negative actions. This is what the funder financed under reported codes, not necessarily what it contracted for directly.

About this example

This fixed public sample uses an actual GETWAB report snapshot dated 2026-11-19. The commentary was written for this example without a runtime model. Reusable SQL and supporting tables are provided with an ordered report, not with this preview.
