Methodology

Period and source

FPDS Award actions signed in FY 2026, through the 2026-11-19 signed-date cutoff (UTC). A federal fiscal year starts October 1. Unsigned or undated actions, IDVs and Other Transactions are outside scope. Closed years can still be revised.

Geography

A ranked record needs a reported country of USA and one of the 50 state codes in the principal place of performance. This is the reported primary location, not the recipient address or a distribution across multiple worksites.

DC, recognized U.S. territories and possessions, military mail, unmatched U.S. states, unmatched country codes and other reported country codes are listed separately. Missing geography is not imputed from other fields.

Amounts and ranking

Sum signed obligated amounts in integer cents, including deobligations. This is not payment, outlay or potential contract value. Action counts include records without an amount; those amounts do not enter the sum.

States rank by net obligations from highest to lowest, breaking equal amounts by state code. States without a reported amount remain visible but unranked; zero is shown only when reported amounts net to zero.

Conclusions

Analyst commentary / static archive sample

What the data shows

The state ranking covers 5.19 million of 5.43 million dated actions. The remaining 247,344 actions do not belong in a 50-state table; retain the reconciliation rather than treating them as zero or distributing them to states.

How to use the result

Virginia's $122.46 billion represents roughly 16.5% of the $739.98 billion ranked state net. Place of performance is not the supplier's headquarters and may not describe every project location. Use the ranking to select a local market for deeper buyer and code analysis, not to infer a firm's location.

About this example
