Disclosure Statement

This report uses publicly available data from the Federal Procurement Data System (FPDS). It is intended for informational and analytical purposes.

At a glance

Selected scope: Agency 3600.

331,113 dated award actions in 38 calendar months with recorded activity.

59,785 actions with negative obligations, totaling -$7,031,080,016.12.

Coverage is observed in the source, not certification that all actions were reported.

Methodology

Source and coverage

FPDS Award actions in GETWAB's dataset with a usable signed date within the selected scope. Undated or malformed-date records cannot be allocated to a fiscal year. Missing amounts stay in the quality denominator.

Queried on November 19, 2026; latest signed date in scope: November 18, 2026. Observed months count months with at least one matching action. Neither measure proves reporting completeness; unobserved years are omitted.

Parameters

Awarding agency: 3600. Exact contracting-office agency code; not the funding agency or a department roll-up.

NAICS: Any (principal industry classification). PSC: Any (product or service classification). Supplied filters are combined with AND; blanks do not restrict results.

Start fiscal year: FY 2024. End fiscal year: FY 2027. Both endpoints are included. Fiscal years are assigned by signed date and run from October 1 to September 30. An open fiscal year is partial.

Layout: Portrait. This changes the page format, not the data.

Metrics and limits

Action counts are records, not distinct contracts. Estimated awards use the award agency and PIID together (approximate distinct count). The whole-period estimate is computed separately; do not sum yearly estimates. An all-zero modification ID marks a base action; other nonblank IDs mark modifications.

Positive and negative obligations are summed separately in integer cents. Negative actions reduce net obligations and do not establish their cause. Zero is a reported amount; null amounts are counted separately and do not enter dollar sums.

Gaps are blanks or invalid formats: agency (2–8 alphanumeric), UEI (12 alphanumeric), NAICS (6 digits), PSC (4 alphanumeric), country (3 letters), and U.S. state (2 letters when country is USA). Award keys require both agency and PIID. Passing a check does not prove correctness.

Gap rates use eligible actions, with U.S. state limited to actions reporting country USA. Filtered fields cannot be evaluated for overall completeness. Compare rates and denominators only across equivalent scopes and closed years.

Reproduce the results

Open SFPR-META-COLL-1.sql in the accompanying ZIP (also available as a separate download). Run the labeled SELECT statements one at a time in FPDS Query. Confirm the signed-date and scope filters before comparing the result. Reruns against newly updated FPDS data may differ.

The SQL returns whole-period and fiscal-year rows. Monetary columns ending in _cents use cents.

Conclusions

Analyst commentary / static archive sample

What the data shows

There were 331,113 dated actions across 38 observed months, including 59,785 actions with negative obligations totaling about $7.03 billion in reductions. Comparing gross positive and negative entries is more informative than relying on a single net total to describe data activity.

How to use the result

Only two eligible records in this cohort failed the principal–NAICS presence/format check. That tells us a field is nearly always populated here, not that it is always correct. Use the eligibility denominators, reported date coverage and filter scope before comparing data quality across cohorts.

About this example

This fixed public sample uses an actual GETWAB report snapshot dated 2026–11–19. The commentary was written for this example without a runtime model. Reusable SQL and supporting tables are provided with an ordered report, not with this preview.
