Disclosure Statement

This report uses publicly available data from the Federal Procurement Data System (FPDS). It is intended for informational and analytical purposes.

At a glance

174 distinct identifiable awards across 649 reported Award actions.

Latest matched signed date: 2026-09-30. 0 actions lacked a complete award identity and were counted only as actions.

An award can recur across years. The full-period distinct count is calculated separately, not by adding annual counts.

Reported awards and actions

Fiscal year	Actions	Distinct awards	Base actions	Modifications	Unknown type
FY 2025	310	139	24	286	0
FY 2026	339	140	32	307	0
Full period	649	174	56	593	0

Methodology

Source and scope

FPDS Award actions signed in FY 2025 through FY 2026, inclusive, through 2026-11-19 (UTC). Federal fiscal years start October 1. IDVs, Other Transactions and actions without usable signed dates are excluded.

Awarding agency: 3600; principal NAICS: 541512; PSC: DA01. Filters are exact and combined with AND. Awarding agency is the contracting-office agency, not the funder.

Distinct awards versus reported actions

An action is one matching FPDS record. A distinct award uses award agency and PIID plus referenced vehicle agency and PIID. Trim and uppercase these identifiers. Actions without an award agency or PIID stay in the action count but not the award count.

Deduplicate inside each year and again across the full period. One award may appear in multiple years. No obligation-amount filter is applied.

Reported action type

An all-zero modification number is classified as base. A nonblank number other than all zeros is classified as a modification. A blank or null number stays unknown. These three groups reconcile to all reported actions and do not measure unique new contracts.

Reproduce the result

Queried at 2026-11-19T19:47:26+00:00. Rerun the exact SELECT in the ZIP in GETWAB FPDS Query. Counts reflect the available source at query time.

Conclusions

Analyst commentary / static archive sample

What the data shows

The scope has 649 actions but only 174 distinct identifiable awards. Most actions, 593, were labeled modifications, versus 56 marked base. A transaction count would therefore substantially overstate an award count for this slice.

How to use the result

The report deduplicates the whole period independently. Do not add annual award counts across fiscal years, since an award can recur. A base marker is reported action metadata, not independently verified procurement initiation, so confirm the award identity and modification history when the distinction matters.

About this example

This fixed public sample uses an actual GETWAB report snapshot dated 2026-11-19. The commentary was written for this example without a runtime model. Reusable SQL and supporting tables are provided with an ordered report, not with this preview.
