Disclosure Statement

This report uses publicly available data from the Federal Procurement Data System (FPDS). It is intended for informational and analytical purposes.

At a glance

53 negative actions out of 649 dated Award actions.

Latest matched signed date: 2026-09-30. 0 actions lacked an obligation amount.

The review lists are sorted by amount only. A large or negative obligation is not evidence of wrongdoing.

Methodology

Source and scope

FPDS Award actions signed in FY 2025 through FY 2026, inclusive, through 2026-11-19 (UTC). Fiscal years start October 1. IDVs, Other Transactions and actions without usable signed dates are excluded.

Awarding agency: 3600; principal NAICS: 541512; PSC: DA01. Filters are exact and combined with AND. Awarding agency is the contracting-office agency, not the funder.

Amounts and interpretation

Sum signed obligation amounts in cents. Negative amounts reduce recorded obligations; positive amounts increase them. No amount is treated as a reported zero unless the record actually reports zero. These amounts are not payments or changes in ceilings.

A row is one reported Award action, not a contract. The reasons behind individual adjustments are not inferred.

Review lists and identifiers

The absolute list uses all nonzero reported obligation actions; the negative list uses reductions only. Both are ordered by absolute amount, then most recent signed date and source record ID. An action can appear in both lists.

The PDF shows up to 5 actions in each list; the CSV includes up to 20 per list with award agency, PIID, modification number, transaction number, any referenced vehicle and source record ID. Blank identifiers are not inferred.

Reproduce the result

Queried at 2026-11-19T19:59:40+00:00. The ZIP contains the two exact SELECT statements, the PDF and the review CSV. Run each SELECT separately in GETWAB FPDS Query. Import identifier columns as text to preserve leading zeros.

Conclusions

Analyst commentary / static archive sample

What the data shows

The signed net is $4.93 billion. The 53 negative actions reduced recorded obligations by $42.85 million; showing them separately distinguishes signed adjustments from overall volume. This scope had no missing amounts, but reporting completeness can differ in other slices.

How to use the result

Use the largest-absolute-action table to locate material movements and the reduction table to investigate specific transactions. Inspect modification reasons before attributing them to cancellations or errors. Neither the signed net nor a negative action measures cash paid.
