Disclosure Statement

This report uses publicly available data from the Federal Procurement Data System (FPDS). It is intended for informational and analytical purposes.

At a glance

205,696 dated Award actions. Signed dates: 2024-10-01 to 2026-09-30.

Latest usable source modification date: 2026-11-18. Queried: 2026-11-19 20:07 UTC.

Filtered fields are not scored: the exact filter excludes records with a missing code.

Completeness by field

Field	Eligible actions	Missing or unusable	Gap rate
Award key (agency + PIID)	205,696	0	0.00%
Recipient UEI	205,696	0	0.00%
Awarding agency code	–	–	Filtered
Principal NAICS	205,696	0	0.00%
PSC	205,696	0	0.00%
Performance country	205,696	0	0.00%
U.S. performance state	205,359	0	0.00%
Source modification date	205,696	0	0.00%

Methodology

Scope and denominator

FPDS Award actions signed in FY 2025 through FY 2026, inclusive, through 2026-11-19 (UTC). The federal fiscal year starts October 1. IDVs, Other Transactions and records without usable signed dates are excluded.

Awarding agency: 3600; principal NAICS: Any; PSC: Any. Exact filters combine with AND. An agency filter uses the contracting-office agency, not the funder.

Denominators are matched Award actions, not unique awards. The U.S. performance-state check uses only actions reporting country USA. No percentage is shown for a zero denominator or for a field already used as an exact filter.

Presence and format checks

Award identity requires nonblank award agency and PIID. After normalization, UEI uses 12 alphanumeric characters, awarding agency 2-8 alphanumeric characters, NAICS six digits and PSC four alphanumeric characters.

Performance country and U.S. state use three and two letters respectively. These checks do not verify registration status, geographic accuracy, or that codes appear in a current registry.

Source vintage

Latest signed date describes the observed activity. Latest source modification date is the latest parseable reported FPDS date on or before the query date among matched actions. A blank, unparseable, or future-dated modification is unusable.

The query ran at 2026-11-19T20:07:00+00:00. The reported modification date is not the database load time or a guarantee of complete reporting.

Reproduce the result

The ZIP contains the PDF and exact SELECT. Run it in GETWAB FPDS Query to verify the counts and dates. Divide each unfiltered gap count by its eligible action denominator.

GETWAB FPDS Query

Conclusions

Analyst commentary / static archive sample

What the data shows

The assessment tested 205,696 dated actions, with a latest matched signature date of September 30, 2026. The latest usable source modification date was November 18; those are two different measures of recency.

How to use the result

No unusable values appeared among eligible unfiltered fields in this sample. That is a presence and format result, not a validation of field accuracy. An exact filter can pre-exclude blanks in the field being filtered; check the denominator and remove that filter before trying to measure field-wide completeness.

About this example

This fixed public sample uses an actual GETWAB report snapshot dated 2026-11-19. The commentary was written for this example without a runtime model. Reusable SQL and supporting tables are provided with an ordered report, not with this preview.
