Methodology

Source and coverage

FPDS Award actions in GETWAB's FPDS dataset. Actions without a usable signed date or obligation amount are excluded. Queried on November 19, 2026; latest signed date in the selected scope: November 18, 2026. This is not a completeness or refresh date.

Parameters

Awarding agency: 3600. Exact contracting-office agency code; not the funding agency or a department roll-up.

NAICS: Any (principal industry classification). PSC: Any (product or service classification). Supplied filters are combined with AND; blanks do not restrict results.

Start fiscal year: FY 2024. End fiscal year: FY 2027. Both endpoints are included. Fiscal years are assigned by signed date and run from October 1 to September 30. An open fiscal year is partial.

Layout: Portrait. This changes the page format, not the data.

Metrics and limits

Net obligations add the signed award-action amounts, including negative adjustments. They are not cash outlays or award ceilings. Actions count reported transactions, not distinct contracts.

Year-over-year change compares adjacent observed, completed fiscal years. Percent change divides the dollar change by positive prior-year net obligations. A missing year is not zero. Display rounding can affect totals by cents.

Annual totals sum the quarterly aggregates, each rounded to cents. Q1 begins in October. The detail separates closed, partial and not-started quarters at the query date. Closed means the calendar period ended, not that all actions were reported.

Seasonality pools each quarter over observed closed fiscal years; missing quarters are not imputed. Shares are based on positive pooled net obligations and can be negative when adjustments outweigh obligations.

Reproduce the results

Open SFPR-TIME-COLL-1.sql in the accompanying ZIP (also available as a separate download). Run the labeled SELECT statements one at a time in FPDS Query. Confirm the signed-date and scope filters before comparing the result. Reruns against newly updated FPDS data may differ.

Conclusions

Analyst commentary / static archive sample

What the data shows

The selected scope recorded $236.84 billion across 331,113 actions, with a $7.45 billion increase from FY 2025 to FY 2026. Reported totals can change because of large transactions, negative adjustments or late updates, so the report does not assume an increase in every quarter.

How to use the result

Q4 led the pooled closed-year quarters at $87.19 billion. Pooling is useful for spotting concentration, but confirm the pattern in each year and separate the open fiscal year before using it as a planning assumption. Signed-action timing is not the payment calendar.

About this example

This fixed public sample uses an actual GETWAB report snapshot dated 2026-11-19. The commentary was written for this example without a runtime model. Reusable SQL and supporting tables are provided with an ordered report, not with this preview.
