## STANDARDIZED FEDERAL PROCUREMENT REPORT
## YEAR-OVER-YEAR FEDERAL CONTRACT OBLIGATIONS

### All FPDS awards (FY 2025 vs FY 2026)

Prepared by: GETWAB INC.

**Disclosure Statement**

This report uses publicly available data from the Federal Procurement Data System (FPDS). It is intended for informational and analytical purposes.

## At a glance

The comparison uses the same scope and filters for both completed fiscal years.

Latest matched signed dates: FY 2025 – 2025-09-30; FY 2026 – 2026-09-30.

## Change in net obligations (USD)

| FY 2025 net | FY 2026 net | Dollar change | Percent change |
|---|---|---|---|
| $780,419,040,743.25 | $807,707,140,877.39 | +$27,288,100,134.14 | +3.50% |

# Methodology

## Source and period

FPDS Award actions dated in completed FY 2025 and FY 2026 only, using signed dates in UTC. Federal fiscal years start October 1 and end September 30. Intervening years are excluded. Closed years can still be revised.

IDVs, Other Transactions and actions without a usable signed date are not included.

## Filters

Awarding agency: Any (contracting-office agency, not the funder); principal NAICS: Any; PSC: Any. When set, codes must match exactly and filters combine with AND.

## Net obligations and change

Sum signed obligations in cents, including deobligations. Net obligations are not payments or contract ceilings. A year with no reported amount is not zero.

Dollar change is later net minus earlier net, when both amounts are reported. Percentage change is dollar change divided by the earlier net, times 100, only when the earlier net is positive. A dash means not available.

## Reproduce the result

Queried at 2026-11-19T18:50:39+00:00. The ZIP includes the PDF and exact SELECT. Run the SELECT in GETWAB FPDS Query to verify both net totals, the changes, counts and latest matched signed dates against the available records.

# Conclusions

Analyst commentary / static archive sample

## What the data shows

Reported net obligations increased 3.50%, or $27.29 billion, between the FY 2025 and FY 2026 endpoints. The dollar and percent changes describe the same change at different scales, not two independent indicators.

## How to use the result

This report is intentionally narrow: it does not break down the change by agency, quarter or contract type. Use a separate funding or time analysis to test which groups drove it. Signed net obligations incorporate reductions and do not represent spending paid out.

## About this example

This fixed public sample uses an actual GETWAB report snapshot dated 2026-11-19. The commentary was written for this example without a runtime model. Reusable SQL and supporting tables are provided with an ordered report, not with this preview.
