| – | Other ranked codes | $2,342,480,618.71 | 1,332 |

# Methodology

## Source and scope

Dated FPDS Award actions in FY 2025 to FY 2026, inclusive, with a signed date through the 2026-11-19 cutoff (UTC). Federal fiscal years start October 1. IDVs and Other Transactions are excluded.

The recorded recipient UEI must match C47BNA8GM833 exactly after trimming and uppercasing. No parent-company or affiliate roll-up is performed. The displayed recipient name comes from the latest matched action with a nonblank name.

## Net obligations and award counts

Sum signed obligation amounts in cents, including deobligations. These are not payments or ceilings. Actions missing an amount still count as actions; missing amounts are not reported zeros.

Count distinct award identities by award agency, PIID and referenced vehicle agency and PIID. An action missing its award agency or PIID is excluded from the distinct count, but remains in action totals. This is not a count of newly signed contracts.

## Rankings

Rank up to 5 groups per view by net obligations, ties by code. Buyers use the contracting-office agency code, not the funder. Classifications use principal NAICS and PSC on the action. The three views describe the same portfolio; do not add them together.

Missing and unusable codes stay in totals but are not ranked. Code labels are the latest nonblank labels in scope.

## Reproduce the result

Queried at 2026-11-19T19:07:55+00:00. Use the exact SELECT in the ZIP in GETWAB FPDS Query. The query includes the overall totals and all code groups.

## Sources and verification

GETWAB FPDS Query

# Conclusions

Analyst commentary / static archive sample

## What the data shows

The portfolio has 3,465 dated actions, 708 identifiable awards and $6.77 billion in net obligations for the exact recipient. These counts communicate workload and scale differently; changes over the life of the same award inflate action counts, not distinct award counts.

## How to use the result

NAICS 541512 was the leading reported industry grouping at $5.59 billion. Use the market and buyer breakdowns to understand the concentration before extending a conclusion to the whole federal market. The report does not aggregate subsidiaries or describe financial performance.

## About this example

This fixed public sample uses an actual GETWAB report snapshot dated 2026-11-19. The commentary was written for this example without a runtime model. Reusable SQL and supporting tables are provided with an ordered report, not with this preview.
