#10	LEIDOS, INC.	MDSWM6MB1BH7	$630,296,683.00	16	FEDERAL ACQUISITION SERVICE (4732)

Methodology

Source and scope

Dated FPDS Award actions in FY 2025 through FY 2026, inclusive, signed through 2026-11-19 (UTC). Federal fiscal years start October 1. IDVs and Other Transactions are excluded.

Exact reported PSC: DA01. Awarding agency code: Any. This is the contracting-office agency, not the funder or a roll-up to a parent department.

Net obligations and award counts

Net obligations are signed amounts in cents including deobligations, not payments or contract ceilings. Actions missing an amount still count.

Distinct awards use award agency, PIID and referenced vehicle agency and PIID. An action missing award agency or PIID is omitted from the distinct count. Counts are unique within each group; do not add counts across groups.

Ranking and coverage

Ranks up to ten distinct recipient UEIs with reported amounts by net obligations; ties break by UEI. Does not combine affiliates. Missing or malformed UEIs stay in market totals but are not ranked.

The leading buyer for each supplier is its largest reported awarding agency by net obligations; the market buyer table lists up to five across all actions. Buyer ties break by code. Blank codes and amounts are not ranked.

Reproduce the result

Queried at 2026-11-19T19:15:04+00:00. Rerun the exact SELECT in the ZIP in GETWAB FPDS Query to verify the rankings and counts.

Conclusions

Analyst commentary / static archive sample

What the data shows

The selected market contains 62,338 dated actions across 19,787 identifiable awards. Its first-ranked supplier accounts for $2.50 billion across 199 awards. The leader's position comes from obligations, not from being the most frequent recipient.

How to use the result

Use the leading buyer for each vendor as a starting point for research, then inspect the actual award dates and values. Compare ranks within the selected market and period; separate UEIs represent separate identities here, and reported award amounts should not be read as revenue.

About this example

This fixed public sample uses an actual GETWAB report snapshot dated 2026-11-19. The commentary was written for this example without a runtime model. Reusable SQL and supporting tables are provided with an ordered report, not with this preview.
